- 2/6/01, 7:00 AM EST - 10:00 AM PST, Optical Network Conference Papers 6/6

75% of your allocated storage is used: 6/8  6/9

#### Notes:

- (1) When the user presses the 'Content Preloads' button, the content currently displayed via the Web browser is selected for preload. This requires the Web browser to provide an application programming interface (API) that enables the user calendar to determine the content that is currently displayed.
- (2) The user calendar stores the addresses of proxies to which requests for content preload were transmitted.
- (3) If an event is cancelled or rescheduled, the user calendar transmits a message to each of the proxies so they may delete the associated scheduled preload of multimedia content.
